MY SkillsUSA FRAMEWORK STORY

I’m ready because SkillsUSA and career and technical education (CTE) have given me job-specific skills. Just recently in my graphic design and production class I became Adobe Illustrator Certified. In order to gain this certification I had to show that I have a competency for design, printing and Adobe Illustrator. SkillsUSA has prepared me for my future by offering a way to excel in developing my job specific skills.

CTE BELIEF STATEMENT

I believe that CTE enlightens students. I believe it gives them the knowledge and understanding of their chosen career. CTE and SkillsUSA offer a way for students to exceed expectations.

FUTURE GOALS

After high school, I plan to attend college and study graphic design and chemistry. I’d love to combine both of my passions and create educational materials for students, teach students and create lifelong learners in the process.
