CTE Belief Statement

I believe career and technical education allows students of any background to pursue an education of their choice in a field they enjoy. As CTE continues to offer various programs, students can confidently take their future into their own hands with the support of instructors and industry.

My Framework Story

Every year, my CTE campus holds mock job interviews for students, so we can gain experience before venturing off into the real world. “I” Day was both nerve-wracking and exciting for me as a first-year student. There were just so many details to consider. What would I wear? What would I say? How strong was my résumé? As my instructors walked us through business etiquette and conversation tactics, I realized there was so much I didn't know about the professional world, but also so much I could improve on. I left my mock interview that day with a new sense of confidence in my professional development, secure in the knowledge that I could determine my future, and it could start with something as simple as a handshake. What are some ways you can grow in your professional development?
