TECHNICAL
FRIDAYS

RECAP

2022 - 2023

Technical Fridays are virtual workshops led by industry experts to help teachers develop specific technical skills relevant in their career field of interest. The targeted participants are teachers who would benefit from incorporating the skill into their classroom instruction.

“Great training. We need more hands-on trainings like these!
– Law, Public Safety, Corrections & Security session participant

“This course/session was great. I would truly enjoy attending more courses that connect to my program/course of study.
– Cosmetology session participant

“This was something I always get questioned about from my students. Thank you for the demonstration and even more for how to frame this within the lesson.
– Culinary Arts session participant

“Had no idea that this was available, totally impressed and grateful that John Deere is allowing us to use this in our courses. Thank you very much.
– Architecture & Construction session participant

“Absolutely loved getting to listen to Mike! The Q&A at the end was wonderful, his talking about failure and not being afraid to make mistakes is wonderful advice for up and coming filmmakers and students.
– A/V Technology & Communications session participant

“I appreciated being able to ask questions and have time for it in the session. – A/V Technology & Communications session participant

“Wonderful and very fruitful presentation! If I would say anything though, I believe creating a Technical Friday over something such as this but a longer event that includes using the program and getting some unique hands-on experience with it. Thank you!
– Law, Public Safety, Corrections & Security session participant
