Shared Experience 10

- Complete a family tree and see what connections this makes to your experiences now and your future.
- In the trunk, list your family name.
- In the branches, include each person you consider a family member. This might include extended family and maybe even some close family friends.
- On the leaves for each branch, include the roles each family member has. This can include paid roles (jobs) and unpaid roles (family responsibilities, volunteer roles, etc.)
- Outside of the tree, draw or write down the values of your family.
- Create a list together about how these pieces of information influence your child's future.
